Product highlights

50 mm speaker driver
The 50 mm speaker driver combines the sensitivity of composite Mylar material with the power of neodymium for the magnetic circuit to deliver powerful, distortion-free sound.

Digital Wireless transmission
Digital wireless transmission not only ensures more consistent reception and better quality audio than analog FM transmission systems, it also uses less power. And thanks to patented Philips technology, the audio remains in perfect sync with video when walking around.

Energizing docking station
The docking station is the most convenient way to store your receiver when not in use. At the same time, it will recharge your reciever unit and have it ready for use at any moment.

full digital signal processing
The audio signal is digital from the transmission link right up to the headphone, ensuring top quality and excellent resistance to interference.

Easy adjustable headband
The easily adjustable mechanism provides a comfortable close fitting acoustic seal between the ear cushion and ear, ensuring optimal performance.
